Fire Alarm Systems Inspection Guide

- *Location and installation of devices (control/annunciator panels, smoke detectors, audible/visible devices, pull stations, sprinkler flow and tamper devices, voice communications, etc.).

- *Operational test of fire alarm system, including interconnection with other building systems such as fire suppression, electrical/mechanical, elevator, smoke exhaust systems, etc. Also, see certification checklist for documentation required.

- *Operational test of system using secondary power supply.

- *Fire alarm interconnection with monitoring company.

- Area of rescue assistance communication and ventilation systems.

- Label, red color and lockout means on FACP circuit breakers.

- Test plan documentation has been prepared in accordance with NFPA 72.

*NFPA 72 record of completion form required, prior to demonstration of system to OUBO. For additional information go to NFPA Codes and Standards free access.
